STRATEGIC OVERVIEW OF THE DISTRICT

INTRODUCTION

Name of District: Upper West Akim District Assembly.

Legislative Instrument (LI) that established the District: Legislative Instrument (LI) 2126 of 2012.

POPULATION

The population of Upper West Akim District, according to the 2010 Population and Housing Census, is 87,051 representing 3.3 percent of the region's total population. With an annual population growth rate of 2.15%, the District's population for 2019 is estimated to be 105,161. This is made up of 51,529 males and 53,632 females representing 49% and 51% of the total population respectively.

DISTRICT ECONOMY

LOCATION AND SIZE

The District is located on the south-western part of Eastern Region and it has Adeiso as its capital town which can be found along the main Nsawam-Asamankese highway. The District shares boundaries with the Ayensuano District to the east, West Akim Municipality to the north, Nsawam Adoagyiri Municipality to the south eastern part, Ga South Municipality to the south and Awutu-Afutu Senya District in the Central region to the west. The Upper West Akim District is the only district in the Eastern Region that shares boundaries with the Central and Greater Accra Regions. It has a total land size of about 342.3 km².

EDUCATION

Enhancing inclusive, equitable access and participation in education at all levels has been a priority of the District Assembly. Due to this, the District Assembly is committed to providing the necessary infrastructure and logistics needed to improve the quality of teaching and learning in the District. There are currently one hundred and seventy-

two (172) public schools and ninety-seven (97) private schools, totaling two hundred and sixty-nine (269) schools in the District.

HEALTH

The District has twenty-five (25) public health facilities made up of four (4) health centres and twenty-one (21) functional CHPS zones which are spread across the entire District. There is also one Maternity Home and a Clinic which are privately owned in the District as well. The District has seven (7) sub-Districts for health service delivery.

AGRICULTURE

The agriculture sector is the most important and the predominant sector in the District's economy. The sector is the main backbone of the district and thus employs over 60% of the economically active population. The agricultural system practiced in the district is largely the subsistence system of farming, mostly mixed cropping, usually to sell and for home consumption. However, about 10% of the farmer population is engaged in commercial agriculture. Major crops cultivated are cassava, maize, plantain, pineapple, pawpaw, oil palm, and vegetables. The types of livestock commonly reared include poultry, sheep, goats, cattle, chicken, pigs and rabbits.

ROADS

There are two (2) major roads that runs through the District. These are the Nsawam-Kade Highway and Adeiso-Bawjiase Highway. There are several feeder roads that link various towns and villages to each other within the district. Most of these feeder roads are in poor state and become un-motorable /inaccessible during raining seasons hence restricting the movement of people and farm produce to commercial areas.

TOURISM

Upper West Akim District has potential tourist attraction sites that would be harnessed to attract both domestic and foreign tourists for the development of the District. The major attraction sites are:

- Okurase Wood Carving Village where there are different sites for carving wood artifacts
- The Two-in-One Coconut Tree at Nyanoah

- The mysterious Palm Tree (The Snake like-Palm Tree) at Sukrong Canaan
- KwakuYirebi/Odeng Cave (A funnel shaped cave on a hill) at Sukrong-Awenfi

SANITATION

Sanitation remains a challenge in the District, especially in the urban areas due to inadequate sanitation facilities, poor human attitudes and low household income. Most of the households (46.2%) in the District use public toilets, 28.8% uses pit latrine while 14.8% have no facility hence resort to open defecation (bush/field). More of the households in the urban areas (62.1%) than in rural areas (40.9%) use the public toilets, likewise more of the households (33.7%) in the rural areas use pit latrine compared to households in urban areas (14.3%). Very few households (0.6%) in the District still use bucket/pan latrine and it is very high among urban households (1.7%) than rural households (0.2%).

GREEN ECONOMY AND ENVIRONMENT

The District lies within the semi-deciduous forest zone. The vegetation is mainly characterized by tall trees with evergreen undergrowth and contains valuable economic trees. Most of the trees shed their leaves during the dry season. The District has broken forest on most hill tops, secondary forest on slopes and valleys, shrubs and bushes along the motor roads and main footpaths, thickets on the range facing the Adeiso Township and forest reserves. There are two major forest reserves, forest patches and sacred groves scattered all over the District. Notable ones can be found in towns such as Adeiso-Alafia called Korklofa, Okainkrom-Tigara and Afarikrom.

KEY ISSUES

The following are some of the key identified problems confronting the District's development:

NB// The IGF estimate (compensation, goods and services and the assets) was adjusted upwards after the 2019 mid-year review from GHC516,350.00 to GHC 658,000.00. The high variance of GHC 141,650.00 between the initial and revised estimates are attributed to the following reasons which are all in line with implementation of

the 2019 Revenue Improvement Action Plan (RIAP):

- **Identification of more businesses within the District during the on-going Business data collection exercise.**
- **Intensified and localized public sensitizations and stakeholder consultative meetings on revenue generation.**
- **Formation and enforcement of the revenue mobilization taskforce.**
- **Logistical support to revenue collectors (revenue pick-up, ID cards, rain coats, Assembly embossed revenue jackets).**

The Assembly, thus, exceeded its target mid-year target by 14.81%. The identification of more revenue generation potentials during the socio-economic data collection process, increased sensitization and monitoring, coupled with the availability of a revenue mobilization vehicle have all necessitated an upward adjustment of the IGF budget from GH¢516,350.00 to GH¢573,350.00.
